Aurora Solar Customer Handbook

Aurora Solar was founded in 2014 and its headquarters are in Pune, India. The company designs, sells and installs rooftop solar systems for homes and small businesses.

Every residential installation is carried out by a certified two-person crew. A standard installation takes two days from the moment the crew arrives on site.

The AuroraCell home battery has a usable capacity of 13.5 kWh and can power a typical household for about one evening during a grid outage.

Warranty and Returns

Aurora solar panels are covered by a 10 year product warranty. The inverter carries a separate 5 year warranty, and the AuroraCell battery is covered for 8 years.

Customers may request a full refund within 30 days of installation completion. Refund requests must be submitted in writing to the billing team and are processed within 14 business days.

Damage caused by unauthorized modifications or by cyclones above category two is not covered by the warranty.

Support and Contact

The customer support desk is open from 9 am to 6 pm, Monday to Friday. It is closed on weekends and on national public holidays.

For urgent safety problems such as a burning smell from the inverter, customers should switch off the main isolator and call the emergency line immediately.

Maintenance visits are free during the first year. After that, an annual cleaning and inspection visit costs 2,500 rupees.
